SURFACE MOUNT THERMOCOUPLES & RTD'S

Stainless steel pipe clamp adapters are ideal for attaching bayonet thermocouples or RTD's to steam, process or heat-transfer lines where temperature must be determined at various points. The thermocouple tip is in direct contact with the pipe for first response. No shut down time required to install. They are easy to install and the thermocouple can be detached with a twist. The mounting extension allows lagging for various insulation thickness.

Pipe clamp adapters can be made to attach to pipes from 1/4" to 16".
