PRESS RELEASE

Oxygen Cleaning

May, 2007

www.thermo-electric-direct.com

Thermo Electric (TE) is pleased to announce the opening of its new “Oxygen Cleaning Facility” in West Chester, Pennsylvania. The new facility has been established as a value added service for those customers that require a “certified” level of cleaning for industrial temperature sensors used in an oxygen-enriched environment.

Located in Thermo Electric’s Pennsylvania plant, the facility is managed by one of our in-house certified clean room technicians who is involved in the manufacture of the Company’s industrial and semi-conductor temperature sensor lines. Cleaning standards meet the requirements of ASTM G93-96 as well as those standards that are specified by the customer.

As one of the leading innovators in the temperature sensor industry, Thermo Electric is proud to be the first temperature sensor manufacturer to provide an in house capability for professional cleaning services. The establishment of the new facility enhances the Company’s ability to better manage the quality of the cleaning process, and in addition, shorten the production cycle by eliminating any dependence on outsourced services. As a result, the customer is assured of a better quality and timely delivered product with the full backing of the Thermo Electric name.

For further Information call Thermo Electric PA, Inc. at 610-692-7990.
